5/32 Blamey Place
Campbell ACT 2612
Telephone: (02) 6249 7533
Fax: (02) 6249 7003

Procedure date: _____ Time: _____

This is a general guide to having a procedure at Campbell Medical Practice.

Note that your appointment is for the procedure only. If you require scripts or referrals, or need to discuss something else, you must schedule a separate appointment with your Doctor.

COST

All procedures incur an instrument fee of \$50.00 on the day. This is non-refundable through Medicare or DVA.

The rest of the account will be settled at your appointment to remove stitches.

We are unable to estimate the total cost of the procedure beforehand. The amount charged is dependent on the pathology result of the excised sample. However, we will ensure that your total out-of-pocket cost (after your Medicare rebate) is \$250.00 to \$300.00 depending on size, number, location and complexity of excisions.

All procedure appointments are for 45 minutes. If you are getting a complex procedure OR multiple sites, you may be advised you will need longer than this. An additional out of pocket fee of \$105 will be added every 15 minutes over the standard 45 minute procedure appointment.

YOUR PROCEDURE

In certain circumstances, the lesion may not be fully excised, and a re-excision may be necessary to ensure the lesion is completely removed. All appointments for re-excisions will be considered as separate procedures and will be billed accordingly.

On the day of your procedure, the nurse and your Doctor will provide you with information on how to care for your wound.

This appointment is strictly for your procedure ONLY. We are unable to accommodate a request for any other kind of health care in this appointment, a separate appointment will need to be made.

Ask our staff or contact the practice on 02 6249 7533 if you have any questions.
